WHAT'S INSIDE AN EMERGENCY SUPPLY KIT?

The emergency supply kit contains basic items that can last 3 days or 72 hours. It should be waterproof, in a secure location, and accessible.

- [ ] First-aid kit
- [ ] Food
- [ ] Flashlight and spare batteries
- [ ] Battery-operated radio
- [ ] Candles, lighters and matches
- [ ] Whistle
- [ ] Mask and alcohol
- [ ] Important documents
- [ ] Knife
- [ ] Blankets, spare clothes and shoes
- [ ] Rope (atleast 7 meters long)
- [ ] Bottled water
- [ ] Toiletries
- [ ] Permanent marker, pen and paper
- [ ] Emergency contact numbers
- [ ] Cash

IF NECESSARY:

- [ ] Baby food and toys
- [ ] Medication (those with special needs)

REMINDER:
Check expiration and best before dates. Replenish items regularly.

Damaged two-storey house with first floor pressed under the second floor in Maribojoc, Bohol.

Earthquakes happen without warning. Let's prepare our home, workplace, and community before they strike. Know the earthquake information and learn how to properly respond during and immediately after an earthquake.

EARTHQUAKE SAFETY GUIDE

FOR FAMILY

DOST DOST-PAGASA DOST-PHIVOLCS DOST-STII DOST-PCIEERD DILG DILG-LGA

1. KNOW YOUR HAZARDS

Check the location of your house if it is situated along or near an active fault or if it is prone to landslide, tsunami, and other hazards using DOST-PHIVOLCS HazardHunterPH *(https://hazardhunter.georisk.gov.ph)*

INSIDE YOUR HOUSE:

- Check stability of heavy furniture and hanging objects such as ceiling fans.
- Store harmful chemicals and flammable materials properly.

2. ENSURE THE SAFETY OF YOUR HOUSE

- Assess the sturdiness of your house using the DOST-PHIVOLCS "How Safe Is My House?" tool *(https://howsafeismyhouse.phivolcs.dost.gov.ph)*
- Identify safe and unsafe spots in your house.
- Consider structural retrofitting of your house to ensure it is earthquake-resilient.

3. ORIENT THE FAMILY MEMBERS

- Educate family members on earthquake, its hazards and impacts.
- Teach family members how to use the first aid kit, fire extinguishers, alarms, switching off water lines, gas tanks, and circuit breaker.

4. PREPARE A FAMILY EMERGENCY SUPPLY KIT

- Assemble supplies enough for 3 days or 72 hours to help you and your family survive after an emergency and make it accessible at all times.
- Store in waterproof and easy-to-carry bags.
- Place in a safe and accessible location.

5. DEVELOP A FAMILY EVACUATION AND COMMUNICATION PLAN

- Identify a meeting place for reuniting in case family members are separated from one another when the earthquake occurred.
- Check the safest and fastest route going to the identified meeting place.
- If tsunami-prone, identify high grounds or know the identified tsunami evacuation area of your community.
- Assign a relative or friend outside your area who will serve as contact person. Make sure everyone in the family knows the name, address, and phone number of the contact person.
- If you have children, inquire with the school administrators about their school policies and procedures during and immediately after the earthquake.

6. KNOW THE COMMUNITY EVACUATION PLAN

- Know the evacuation area identified by the barangay.
- Walk through to the evacuation area using the safest and fastest route; note the time it takes for you to reach it.
- Determine who can assist during an emergency such as doctors, nurses, structural engineers, and other trained responders.

7. KEEP A LIST OF EMERGENCY CONTACT NUMBERS

- Know the community emergency contact numbers and the locations of facilities such as police and fire stations, hospitals, schools, barangay hall, etc.
- Regularly update the contact numbers.

8. PARTICIPATE IN COMMUNITY DRILLS

- Actively participate during community-wide drill.
- Regularly practice the evacuation procedure with your family members.

9. DO THE DUCK/ DROP, COVER, AND HOLD

- Protect yourself during a strong earthquake.
- When an earthquake starts, duck/ drop down under a heavy or sturdy furniture, cover your head, and hold on.
- Stay calm and alert.
- Watch out for falling objects, glass windows, shelves, cabinets, and other heavy objects that may cause injury.

IF NEAR THE SHORE:

- Move to higher grounds or farther inland. Tsunamis might follow after a strong earthquake.

10. ASSESS YOURSELF, YOUR HOUSE, AND OTHERS

- Examine yourself and others for injuries and provide assistance if necessary.
- Inspect your houses for damages on electrical wires, gas lines, walls, floors, and water pipes.
- Do not enter damaged buildings and wait for clearance from authorities.
- Expect aftershocks. It may occur hours, days, weeks, or even months after a strong earthquake.
- Be updated and monitor the latest situation from radio or other media and social platforms.
